# Live Collaboration - Quick setup guide for Small Stadium Kit

Requirements
- myDartfish Pro S
- Computer with Dartfish Pro S
- iPad Pro with myDartfish Express
- Small Stadium kit

Small Stadium Kit (which include the following)
- RTSP Encoder: Blankom SDE-265
- Antenna OmniTik 5 ac
- 2x Ethernet cables

Hardware on the analyst place
1. Do not power up the Blankom yet. Connect the HDMI or SDI cable with the video feed in the Blankom Converter
2. Connect the Blankom Converter to the antenna with an Ethernet cable. Make sure to connect the cable to one of the 4 ports on the right.
3. Connect the Blankom converter to its power source
4. Connect the antenna:
   a. Connect the black Power Supply to the white Power Over Ethernet (POE) adapter
   b. Connect an Ethernet cable to the opposite side of the adapter and connect this cable to the left Ethernet port of the antenna
5. Connect the computer to the antenna with an Ethernet cable (use any of the remaining port on the antenna
   a. If you don't have an Ethernet port on your PC, you can skip that part and connect the PC to the WiFi generated by the OmniTik antenna

Credentials
Wifi: credentials are written in the small box at the bottom of the antenna
